Puzzles were generated and checked by our own puzzle software, and every sudoku was proved by a solver to have exactly one solution. Set in DejaVu Sans (Bitstream Vera licence).

How to play

Fill every empty cell so that each row, each column and each of the nine three-by-three boxes contains the digits 1 to 9 exactly once. There is exactly one solution.

Every puzzle in this book was checked by a solver that read only the printed grid, and has exactly one solution. Difficulty is measured by solving rather than estimated. Solutions are at the back of the book.
